What makes Dar-ul-Madinah Unique?

- Dar-ul-Madinah is different than the other conventional school as here **"Every child is special"**.
- We believe that each child entrusted to us should receive holistic education in its finest form. For us, education is a preparation for life which is an enjoyable, interactive and empowering experience for our children.
- Our learning program aims at developing the whole individual with a versatile all-rounded personality by including Islamic **Virtues & Values**.

Academic

Pre-Primary

Careful upbringing in the formative years of childhood plays a pivotal role in the development of a child's personality. The teacher in a Montessori classroom serves less as an instructor and more as a guide and facilitator. Dar-ul-Madinah pre-primary schooling is a unique and exclusive system having a Montessori environment integrated with Islamic education

Primary

Primary education develops skills of basic literacy and numeracy in young children. It establishes the foundations of pure science, mathematics, geography, history, and other social sciences. Dar-ul-Madinah primary schooling aims to inculcate the true Islamic spirit keeping in view the required educational needs of growing students.

Secondary

Secondary education is crucial as it lays the foundation for higher studies and the profession one would pursue later. Therefore, it becomes mandatory for us to make secondary education engaging in a way that sparks our students to delve into the possibilities and potential of the future

IT Labs

The computers in the school lab have been equipped with appropriate softwares to enable students to compile and run programs as per the syllabus. It has **advanced infrastructure** in terms of hardware and softwares which cater to the requirements of the students, teachers and the curriculum.

Parents Opinion

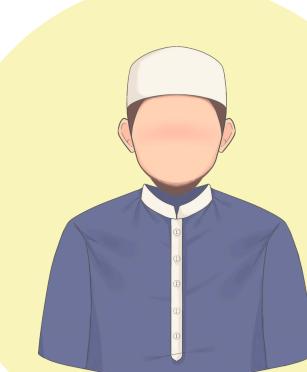

I am very glad to see the transformation in my daughter since joining this school. Thanks to the teachers for giving the proper guidance and care.

Mother of Rafiah Mehnoor
Class: Nursery

The most acceptable thing here is that it is teaching children very well with qualified teachers, which is playing a very good role in improving the quality of children's education.
